SUMMARY

Growth-focused Digital Marketing, AI & Automation Leader with over 10 years of experience driving customer acquisition, retention, and multi-channel profitability. Expert in leveraging predictive analytics, Generative AI agentic workflows, and advanced personalization engines to optimize marketing ROI and scale cross-functional business ecosystems. A strategic bridge builder between technical data science and commercial marketing execution, specializing in high-impact customer journeys and data democratization.

AI DRIVEN CORE COMPETENCIES

- **Growth & MarTech Strategy:** Full-Funnel Customer Acquisition, Retention, Customer Lifecycle Strategy, ROAS & Cost Optimisation.
- **Marketing Automation:** Market Research, Campaign Generation, Performance Analysis, Customer Intelligence, Conversational AI & Chatbots.
- **Data & Analytics:** Churn & Retention Modeling, CLTV Optimization, Customer Segmentation, Sentiment Analysis, A/B Testing.
- **Marketing & Reporting Automation:** Power BI, Looker Studio, n8n, Zapier, Automated Marketing Workflows, Performance Reporting.
- **AI, LLMs:** Mistral, Qwen, Claude, Perplexity, Manus, NotebookLM, n8n, Zapier, Notion AI, Google AI Ecosystem.

TECHNICAL SKILLS

- **Leadership & Stakeholder Management:** Senior Stakeholder Advisory, Cross-Functional Management, Regional/Local Team Collaboration.
- **Business & Technology Strategy:** Translating Business Requirements, Martech & AdTech Strategy, Technology Evaluation and Roadmaps.
- **Vendor Management:** Agency Evaluation, Requirements Gathering, Strategic Communication.
- **Technology & Solution Delivery:** Business Requirements and solutions Roadmap, AdTech/MarTech Architecture, API & Platform Integrations.
- **Analytics & MarTech:** GA4, BigQuery, Adobe, Google Analytics, Bloomreach, Looker Studio, Tableau, Power BI, QlikView, ServiceNow.
- **Tech Stack:** MySQL, Python (TensorFlow, PyTorch, Scikit-learn), Javascript, SQL Server, SSAS, SSRS, SSIS, Oracle, AWS Redshift, IBM db2, SSMS.

WORK EXPERIENCE

Senior Manager-Digital Marketing and Loyalty Landmark Group

Dubai, United Arab Emirates
July 2022-July2026

- Developed a cross-selling recommendation engine by integrating GBQ, GA4, and Merchant Center, improving Lifetime value by 25%.
- Implemented Predictive Churn & Retention model to identify high-risk customers and trigger automated campaigns, reducing churn by 15%.
- Developed a cost optimization agent for campaigns to dynamically allocate budget, optimizing cost and increasing ROAS by 8%.
- Led data-driven A/B testing across landing pages, offers, and journeys, improving conversion rates and reducing bounce rate by 18%.
- Owned growth KPIs across channels by analyzing funnel performance, user behavior, and transactions, driving 25% uplift in CLTV.
- Implemented 100% automated real-time dashboards tracking funnel metrics, ROI, and growth KPIs for continuous optimization.
- Developed Sentiment analysis on NPS score to track social reviews and recommended key areas to uplift NPS from 70.2 to 76.4
- Tech Stack Used: Python, Big Query, SQL, GA4, Funnel, Branch, Claude.ai, notion, n8n, Bloomreach, Power BI.

Manager-Ecommerce Lifecycle and Retention Landmark Group

Dubai, United Arab Emirates
May 2020- July 2022

- Developed an NPS dashboard for the META region, improving scores by 16% and enhancing supply chain decision-making.
- Developed a P&L report integrating marketing spends, product margins, and shipping costs, driving 46% YOY incremental revenue.
- Utilized the RFM model to enhance the Shukran Loyalty Program, driving a 5% reduction in churn rate and boosting engagement.
- Restructured campaign naming conventions and automated reports to track business hygiene of concepts and KPIs. (ROAS, CAC, CR%)
- Executed budget planning for performance channels (SEM, Display, social media, retargeting) and optimized targeted ROAS and CR.
- Integrated data from apps, web traffic, and Hybris-SAP, achieving 99% report accuracy for internal analytics and decision-making.
- Implemented Basket Analysis on historical data to recommend grouped products, leading to 15% increase in cross-sell revenue.
- Tech Stack Used: Python, Big Query, Power BI, SQL, Google Analytics, Funnel.io, Branch, FB manager, Dynamic Actions, Affiliate lands.

Business Intelligence Analyst Mineral Technologies Group DMCC

Dubai, United Arab Emirates
December 2017-April 2020

- Developed, maintained a multidimensional database by ETL concepts that aggregate data from multiple sources for Power BI reports.
- Developed CRM by customer segmentation analysis to predict & improve profitability in sales, marketing & business planning.
- Created KPIs, reports and dashboards for multiple functions to maximize their performance & drive key business decisions.
- Developed economic indicator process depicting organic and inorganic growth, market trends, and regional benchmarks.

Adobe | Business Intelligence Analyst Sales and Account Management Team

Utah, United States
May 2017-November 2017

- Built Creative Cloud adoption dashboards that tracked trial-to-paid conversions, boosting regional ARR visibility by 22%
- Applied regression models and NLP sentiment analysis to customer feedback, reducing enterprise subscription churn by 8%.
- Delivered self-service Tableau metrics dashboards utilized by senior leadership to monitor monthly active users (MAU).
- Developed a customer usage-intensity model that identified pre-churn patterns and high-propensity accounts for team upsells.
- Audited global Creative Cloud checkout funnels using Adobe Analytics, identifying friction points to recapture 4% leakage.
- Tech Stack Used: R, Service Now, JavaScript, SQL, Salesforce, SAP, Adobe Analytics.

University of Utah

Utah, United States

Capstone Project: Sports Analytics, and Dashboard

January 2017-July2017

- Developed new database for UofU men’s Basketball team and performed data mining on athletes’ information for visualization.
- Developed, refined the predictive models, and integrated them with dashboard to gain insights on athletes’ fitness in future.
- Tech Stack Used: SAS, Power BI, SQL Server, MS Excel.

Varian Medical Systems Inc. | Business Intelligence Intern

Utah, United States

Equipping the S&OP with Business & Market Intelligence

August 2016-April 2017

- Integrated data and developed data models and stages for incubating BI in Sales and Operations Planning.
- Created data queries for quality verification and generated BI reports to enhance visibility to C-Suites, Managers, and Leads.
- Tech Stack Used: SAS, QlikView, SQL Server Management Studio, SAP, Salesforce, Service Now, SQL Server, MS Excel.

HCL Technologies Limited

Noida, India

Data Analyst (Client: FedEx)

July 2013 – July 2016

- Build a Regression model to predict alerts traffic in coming months which assisted the senior management team in making strategies.
- Gathered, refined, and integrated data from various stakeholders to create Business Intelligence dashboards using Tableau.
- Developed an excel based MIS for ‘Root Cause Analysis’ of the issues reported, and the corrective action taken.
- Tech Stack Used: ServiceNow, HP OpenView, Keynote, MS Excel, SQL Server, Tableau.

EDUCATION

University of Utah, David Eccles School of Business

Salt Lake City, Utah

Master of Science in Information Systems (MSIS)

December 2017

Course Work: Business Intelligence and Data Analytics | Database management systems | Networks and Servers | Statistics and Predictive Analytics | Data warehouse | Data Analytics and Decision Making | Data Mining | Marketing Analytics

University of Utah, David Eccles School of Business

Salt Lake City, Utah

Master of Science in Business Analytics (MSBA)

December 2017

Course Work: Business Intelligence and Data Analytics | Database management systems | Networks and Servers | Statistics and Predictive Analytics | Data warehouse | Data Analytics and Decision Making | Data Mining | Marketing Analytics

Rajasthan Technical University

Jaipur, India

Bachelor of Technology in Information Technology (Distinction with Honors)

May-2013

SELECTED MARKETING PROJECTS

- **GA4 Marketing Intelligence Autopilot:** [Github: ga4-marketing-intelligence-autopilot](#)
Built a GA4–BigQuery–Python intelligence pipeline for automated performance analysis, anomaly detection, executive reporting and change detection. Integrated **Mistral/Qwen** with a validated AI layer and manager-facing assistant for grounded marketing insights.
- **Customer Lifetime Value Prediction (Python, scikit-learn):** [Github: Customer Purchase Decision Engine](#)
Modular Python pipeline predicting 180-day customer value for 4,966 customers (UCI Online Retail II). Random forest cut prediction error by 30% vs baseline.
- **Customer Purchase Decision Engine:** [Github: Customer Purchase Decision Engine](#)
Built a Python-based decision engine on ~1M Online Retail II transactions to predict 30-day purchase likelihood, segment customer states, and prioritise marketing actions using behavioural and economic signals.
- **Customer Review Sentiment Intelligence (LLM, NLP):** [Github: Sentiment-Analysis](#)
Designed a sentiment taxonomy with escalation rules and classified 401 app reviews with LLMs; calculated NPS and a driver analysis in which the top detractor driver explained 37.7% of detractors; published a live escalation-queue dashboard.
- **UAE Credit Card Intelligence:** [Github: uae-credit-card-intelligence](#)
Built a geo-aware recommendation engine using Python, FastAPI, PostgreSQL, Pydantic and Streamlit to calculate card eligibility, rewards, fees, FX costs and net annual value from individual spending profiles.
